

## PERSONALS.

Mrs. John H. Finks and family have returned from Glenrose.

Mr. W. C. Cooper and daughter have gone on a visit to friends in Kentucky.

Mr. and Mrs. O. B. Caldwell leave to-day for Rome, Ga.

Mr. Joe Thomson took a run up to Fort Worth yesterday and returns this evening.

Mr. A. Hayden and Mr. W. Walker Mrs. C. H. Higginson and family and Mr. and Mrs. Colgin and family have returned from Wootan Wells. They left only two Waco people there.

J. M. Means traveling agent for the Piedmont Air Line, is registered at the McLelland.

Capt. M. E. McLaren, has gone to Wootan Wells, to recuperate.

Messrs W. T. Harris, S. Marx, J. B. Scarborough, Geo. Griffith, W. H. Lessing and M. D. Herring left last night to attend the Democratic convention at Dallas.

Deputy Constable Lockwood is down with fever, and during the absence of Lee Jenkins Mr. Robert Mobberly is acting Constable.

## Shot in his Wagon.

Brady, Aug. 13.—The Brownwood mail carrier brought news here this evening that Thursday the body of J. Y. Crisswell was found near Milbourn in this county on the Brady and Milburn road. He had been shot twice in the face and once through the head from the effect of which he died. His team, hitched to a wagon loaded with sorghum cane hay, was found by the roadside, wound up in the brush near where his body lay. It is supposed that he was shot while on the hay and when he fell off the team wandered into the woods. There is no clew leading to the detection of the perpetrator of the foul deed. This is the second murder committed near Milburn within the last few months.

## Began in Fun.

Greenville, Aug. 13.—At Robert's, Hunt county, to-day Josh Hodges, while playing with a revolver, fatally shot his wife in the presence of his wife's brother. The brother had a valise in which were a pair of brass knuckles and a Colt's pistol. Mr. and Mrs. Hodges were playfully scrambling for a letter one of the parties had. Mrs. Hodges failing to get the letter, playfully got the pair of brass knuckles and ran after her husband. Mr. Hodges gathered up the pistol, which was a self-cocker, and pointing it at his wife discharged it, the bullet entering her forehead and killing her instantly. The woman's brother testified that the killing was accidental.

## Hurled to Death.

Denver Aug. 13.—A singular accident occurred on the Denver Utah and Pacific Railway near Canfield. At that point the track runs direct to the Mitchell Coal Mine: the grade is very steep, and it is customary to ship loaded coal cars to the main track without the assistance of an engine. Yesterday the engineer of the passenger train, upon approaching the branch track, stopped and whistled as usual. He had just started his engine again and reached the crossing when two heavily laden cars, descending the grade, dashed directly into the engine. The locomotive was derailed, and as it fell, Engineer George Hopkins was carried beneath it.

## ALL SORTS.

Magistrate (to plaintiff with lump on his head)—"If your wife threw a sad-iron at you why didn't you dodge?" Plaintiff—"I did, you honor, that's how I come to get hit."—Judge.

Swell (to importunate beggar)—"I have no pennies at present, my good man. I will hand you something coming back." Beggar (dolorously)—"Ah, sir, it was doing business on credit that reduced me to this."—Texas Siftings.

"If you start on a journey," says an old book of wisdom, "and meet a cat, you should at once turn back." The book doesn't say for what purpose you should turn back, but we suppose it is to get your gun.—Burlington Free Press.

His Money's Worth; Mrs. Isaacstein (to husband at Coney Island)—"Vot you sthay in dot water so long for Jacob?" Mr. Isaacstein (teeth chattering and blue with cold)—"Dot b-bath vas t-t-wenty-five cent mit no l-limit. I sthay in so l-long as I c-could, so hellup me."—New York Times.

## SCIENTIFIC SQUIBS.

Pullman, Ill., is to have an electric belt railroad five miles long.

The direct action of steam at 212 degs. is sufficient to destroy all germs in from five to fifteen minutes. The efficacy of heated dry air is uncertain.

Waste silk has been shown to be the most effective non-conductive covering for steam pipes. The price is high, but the demand is very great.

The largest known flower is the Rafflesia, a native of Sumatra. It measures three feet in diameter, weighs fifteen pounds and has a calyx holding six quarts. The odor is offensive.

Railways are said to consume more than half the world's production of iron, the car wheels required in the United States alone taking more than 3,000,000 tons.

Mr. Magnus Volk has applied electricity to propel a dog cart. The current is provided by sixteen accumulators capable of keeping up a supply for six hours. The cart travels nine miles an hour on asphalt.

About 150 colors are now obtained from coal tar, which have almost entirely supplanted vegetable and animal dyes. Indigo and logwood are the only two of the former class considered of much importance.

An electro-magnet with a carrying capacity of 800 pounds is attached to a crane in the Cleveland Steel works, which readily picks up billets and other masses of iron with the aid of any other device. A boy is thus enabled to do the work of a dozen men.

A patent has been granted in England for the manufacture of vinegar from tomatoes. The fruit, when ripe, or nearly so, is reduced to a pulp and steeped in water for twenty-four hours. The resulting liquor is drawn off, sugar added, and the whole allowed to ferment.

Of eighty-eight species of weeds described by Mr. L. H. Fammell, of St. Louis, as growing in southwestern Wisconsin and northwestern Missouri, forty-six are of European and thirty of American origin. One-third of the latter class, and nearly one-fourth of the entire list, are composites.

Oil seems to wear out by long continued use, and to lose to some extent its lubricating qualities. It has been suggested as a reason for this that the minute spherical globules of which the oil is conceived to be made up become flattened by the wear and pressure, and so do not slide and roll over each other as readily as before.

Dr. Otto Witt, a German authority, attaches some importance to a troublesome silk spinner of India—"Gricula trilineata"—from which an excellent fiber has been obtained. This silk worm is extraordinarily productive, the living being surviving two generations in one year, and it forms a new and remarkable source of raw material for the silk industry.

An approximate idea of the amount of manganese contained in steel can be ascertained by means of the magnet. A magnet capable of lifting thirty pounds of ordinary steel or iron will lift a few milligrams if the metal contain 30 per cent. of manganese. So small a quantity as 5 per cent. of manganese will nearly neutralize the magnetic attraction.

An interesting development in photography is in the use of clockwork in printing from negatives. By this means a continuous web of sensitized paper is drawn at suitable intervals under a negative exposed to a source of light. After printing the paper is drawn, still by the mechanism, through "washer," "toner" and "fixer" successively, and appears finally as a series of finished pictures ready for mounting, and all alike in exposure, color and tone.

## SOME WELL KNOWN ORBS.

Governor Hill's eyes are dark and as gray as steel.

Mrs. Frank Leslie has a mild, sentimental eye, an eye that men rave over.

Lillian Russell has fine large eyes. They are almond shape, sentimental eyes.

Clara Morris has large, full eyes. They are sympathetic in the highest degree.

Joseph Pulitzer's eyes are as searching and as restless as a bee in a clover patch.

Howells, the novelist, has searching eyes that wander dreamily around a room.

Mrs. Langtry has eyes that are of perfect shape and full of expression and power.

Charles A. Dana has deep, penetrating eyes that flash from beneath shaggy eyebrows.

Chauncey M. Depew has attractive eyes, sparkling, genial and brimful of pleasantness.

Russell Sage's eyes are gray, but not remarkable, except that they are deep and searching.

Richard Henry Stoddard, the poet, has eyes like a woman. They are dark, gentle and lovable.

Mayor Abram S. Hewitt has eyes that seem to look you through and through. They are never at rest.

Gen. Sherman has a strong, determined eye, full of persistence. Occasionally they dance and sparkle.

Modjeska's eyes combine in a notable degree power and softness. They are full of feeling and vivacious.

Mr. Blaine has eyes gray in color, quick and alert. They seem to take in every object in a room at once.

Fanny Davenport's eyes are small but very expressive. They are sparkling eyes and indicate both humor and pathos.

Dr. Talmage has a mild blue eye shaded by shaggy eyebrows. They are kind and gentle and brimful of kindness.

Salvini's eyes are very large and magnetic. They show that he possesses great will power. His eyebrows are shaggy.

# GOLDSTEIN & MIGEL.

## A PICNIC WEEK FOR EVERYBODY!

IN CLOTHING AND GENTS FURNISHING GOODS. WE HAD BIG SUCCESS LAST WEEK AND WE PROPOSE TO KEEP IT UP WITH MUCH BIGGER BARGAINS.

## MEN'S CLOTHING.
